Dear Hiring Team,

As a highly motivated and experienced software developer with a strong background in programming languages such as Python, C, Java, and Swift, I am excited to apply for this role. With a solid foundation in computer science and software development, I am confident in my ability to design, develop, and implement innovative solutions to complex problems. My experience as a Research Assistant at McMaster University and a Software Developer/DevOps Intern at Ontario Teachers' Pension Plan has provided me with a unique blend of technical skills and industry experience.

My technical expertise includes proficiency in languages such as Python, C, Java, and Swift, as well as experience with cloud platforms like Azure, AWS, and Linux. I have also worked with various databases, including MySQL, Snowflake, and Oracle, and have developed skills in DevOps tools like Jenkins, GitHub Actions, and Ansible. In my personal projects, I have demonstrated my ability to design and develop scalable and efficient solutions, such as my Gym Tracker App, Expense Sheet Combiner, and Gemini-Job-App-Generator. These projects showcase my skills in areas like data persistence, automation, and optimization.

I am excited about the opportunity to bring my skills and experience to a new role and contribute to a team that values innovation and excellence. Thank you for considering my application. I look forward to discussing my qualifications further and exploring how I can make a meaningful contribution to your team.

Sincerely,

Sky Quan
