Sky Quan

Toronto, Ontario, Canada

skyquan23@gmail.com

647-613-7546

Dear Hiring Team,

I am excited to apply for this role, bringing a strong background in software development and research experience. As a skilled programmer with expertise in languages such as Python, Java, C, and Swift, I am confident in my ability to contribute to a dynamic team. My experience as a Research Assistant at McMaster University, where I worked on evolving adaptable control policies using machine learning, has provided me with a solid foundation in research and development.

With a strong foundation in software development, I have also gained experience in DevOps, having implemented CI/CD pipelines using Jenkins, GitHub, Ansible, and SonarQube. My internships and personal projects have allowed me to develop a range of skills, including proficiency in cloud platforms such as Azure and AWS, as well as experience with databases like MySQL, Snowflake, and Oracle. I have also developed multiple personal projects, including a workout tracking app in Swift and a Python application that integrates Google's Gemini 2.0 model to optimize resumes based on job descriptions.

I am eager to apply my skills and experience to a new role, and I am confident that my passion for software development and research will make me a valuable asset to your team. Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further.

Sincerely,

Sky Quan

EDUCATION

Computer Science - Bachelor of Applied Science | McMaster University 2022 - 2027

## TECHNICAL SKILLS

- Python
  - Azure
  - Jira
  - Confluence
  - Networks
  - Cisco
  - SQL
  - Linux
  - Docker
  - Kubernetes

## EXPERIENCE

**DevOps Engineer (CO-OP) | Ontario Teachers' Pension Plan** Sept 2024 - Sept 2025

- Co-led a **POC** for migrating **CI/CD** workflows from **Jenkins** to **GitHub Actions**. Evaluated capabilities and limitation of **actions** compared to **Jenkins**, presenting those findings and best practices to senior leadership, influencing the adoption across multiple teams.
  - Rearchitected the company's **Docker** base image system within **Nexus** and **Kubernetes**, consolidating multiple redundant images around a single standardized **Ubuntu** base image, reducing maintenance complexity and improving efficiency.
  - Applied **Software Development Life Cycle (SDLC)** methodologies to complete project-specific development tasks within **Agile** and **Scrum** frameworks, using **Jira** for sprint management and **Confluence** for documentation.
  - Developed a **Jenkins** pipeline and **Python** script to automate internal webpage updates via a **RESTful API POST request**, streamlining manual change processes.
  - Integrated **SonarQube** to perform automated code quality **testing** and **static analysis** testing across **Dev**, **UAT**, and **Production** environments, enforcing quality gates prior to deployment.

**Research Assistant | McMaster University, Computing and Software** May 2023 – Aug 2023

- Worked with Dr. Stephen Kelly to research evolving adaptable control policies using **gymnasium's** pendulum task and **Distributed Evolutionary Algorithms in Python** (DEAP) to conduct experiments on the observable pendulum task using **machine learning**
  - My work laid the foundation for other projects now continued by Dr. Stephen Kelly's MA students (<https://creativealgorithms-cd4c88.gitlab.io/team/>)

## PROJECTS & EXTRACURRICULARS

**Groq-Job-App-Generator, Groq, Python, Bash, GitHub actions** Feb 2025

- Developed an end-to-end **genAI** pipeline using the **Groq SDK (llama-3.3-70b)** to generate tailored resumes and 225-word cover letters from job descriptions and a structured skillset.
  - **Built LLM-based utilities** to extract structured metadata (company name, job title) from job postings using concise **prompts**.
